

AP Limited Editions skeleton wristwatch

Introduced in 2010

Manually skeletonised and bearing the name of Benzinger, the artisan behind the openworking. The AP initials can be seen at 12 o'clock

HANDCRAFTED

WHAT IS THE COMMON LINK BETWEEN THE WRITING INSTRUMENTS AND WATCHES FROM AP LIMITED EDITIONS?

That is easy; both are excellent examples of the handcraftsmanship behind the products. In the Young Krishna AP Limited Editions pen for example, one can easily see the fine and artistic Maki-e artwork by Japanese master Kogaku San.

Similarly for the AP Limited Editions skeletonised wristwatch, the fine handiwork of Jochen Benzinger can be viewed. All the openworking operations are performed manually by the skilled hands of Benzinger.

Only nine pieces of the skeleton Benzinger wristwatch has been created for AP Limited Editions. AP Limited Editions

remains a high-end fountain pen brand and the wristwatch is merely a complement to the writing instruments, says Anuj Poddar, proprietor and founder of the brand bearing the initials of his name.

The two products are the result of Poddar's deep passion for writing and interest in watch collecting. After all, we have personally witnessed his skilled penmanship and the different timepieces sported on his wrist. **I**

The "Young Krishna" by AP Limited Editions, Maki-e by Kogaku San
